

Retrieving the Number of Physical Devices Signed on by a Given User

[System i Network Systems Management Newsletter](#)

Chuck Lundgren

Wed, 11/12/2003 (All day)

Carsten Flensburg has provided RPG ILE program CBX904, which returns the number of physical devices a privileged user profile (i.e., a user class greater than *USER) is signed on to.

CBX904 is called with a parameter containing either the user profile name or two special values:

- *JOBUSR -- The user profile that started the current job.
- *CURUSR -- The user profile currently registered as job user.

The number of currently signed on devices for the specified user profile is returned in the second parameter. If the specified user profile has user class *USER, zero is returned.

You can download program CBX904 here:
