Thu, 10/20/2005 (All day)

I reported in a previous installment of APIs by Example that the Retrieve Lock Information (QWCRLCKI) API would enter a looping state under certain conditions. IBM has now released PTF SI20375 for V5R3 to correct this problem.

Thank you, IBM, for the speedy response to the problem that I reported!

Click here to read the PTF cover letter:
