## New Command to Print Journalled and Non-Journalled Objects

[System iNetwork Systems Management Newsletter](#)

[Carsten Flensburg](#)

Carsten Flensburg

Wed, 08/31/2005 (All day)

You can always use the **WRKJRNA** (Work with Journal Attributes) command to look at the attributes of a journal to determine which objects are being journalled to that journal. But Ewart Desouza wrote to Carsten and asked for a command that would list the journalled and non-journalled objects in a particular library. He wanted to know which files in his production library are journalled and which are not.

Well, Carsten to the rescue... Here is the command **PRTJNRPT** (Print Journal Report), which does just what Ewart asked for and more...

The command allows you to specify a library name, \*LIBL, \*CURLIB, etc, and allows you to specify if you want a list of journalled, or non-journalled objects, the object types you are interested in, and the report order, like in Object Order, or Library/Object order.

Using the command will submit a batch job that will print the report. The batch job attributes are based upon the Job Description and Output Queue parameters.

```

                                Print Journal Report (PRTJNRPT)

Type choices, press Enter.

Object library ..... MYLIB      Name, *LIBL, *CURLIB...
Object type ..... *ALL          *ALL, *FILE, *DTAQ, *DTAARA
Report type ..... *NOTJRN       *JRN, *NOTJRN
Printing order ..... *LIBOBJ     *LIBOBJ, *OBJ, *JRNLIB...
Job description ..... *USRPRF    Name, *USRPRF
  Library ..... _____ Name, *LIBL, *CURLIB
Output queue ..... *CURRENT     Name, *CURRENT, *JOB, *USRPRF
  Library ..... _____ Name, *LIBL, *CURLIB

```

The following source code included is:

|         |        |                            |
|---------|--------|----------------------------|
| CBX943H | PNLGRP | Print Journal Report       |
| CBX943V | CLP    | Print Journal Report - VCP |
| CBX943X | CMD    | Print Journal Report       |
| CBX9431 | CLP    | Print Journal Report - CPP |
| CBX9432 | RPGLE  | Print Journal Report - CPP |

See each source member for compile instructions and see the help panel group for additional documentation.
