## UTILITY PrtSvrAutE: Print Server Authentication Entries

*[System iNetwork Systems Management Newsletter](#)*

Chuck Lundgren

Wed, 07/07/2004 (All day)

This issue's utility by Carsten Flensburg is the PrtSvrAutE command, which lists the server authentication entries registered to either a specific user or all user profiles on the system. This commands fills a void in OS/400's server authentication entries commands (GO CMDAUTE).

PrtSvrAutE consists of command CBX917X, RPG program CBX917, and panel group CBX917H. Instructions for compiling PrtSvrAutE are included with the source code, which you can obtain here: <http://www2.systeminetwork.com/noderesources/code/clubtechcode/PrtSvrAutE.zip>

The above utility was written by Carsten Flensburg. For questions regarding this tip, contact Carsten at <mailto:flensburg@novasol.dk>.
