Carsten Flensburg

Wed, 10/11/2006 (All day)

In the last issue (September 27, 2006), I presented the command Add NetServer Share (ADDSVRSHR). As I promised, this issue presents the complement command Remove NetServer Share (RMVSVRSHR).

In a future issue, I will present the command Work with NetServer Shares (WRKSVRSHR), in which both commands -- ADDSVRSHR and RMVSVRSHR -- will be used.

I would like to repeat the link for the NetServer website for your reference.

<http://www-03.ibm.com/servers/eserver/series/netserver/>

For more details about command parameters and command usage, refer to the help panel group.

The following source code is included. As always, check the source code headers for compile instructions and additional documentation.

CBX961	RPGLE	Remove Server Share -- CPP
CBX961H	PNLGRP	Remove Server Share -- Help
CBX961X	CMD	Remove Server Share

You can download a zip file containing all the source code at

<http://www2.systeminetwork.com/noderesources/code/clubtechcode/rmvsvrshr.zip>

Note: As with all new programs, test these routines thoroughly before placing them into a production environment. No warranty is expressed or implied.
