## Printing Your Registered Exit Programs Nicely!

[System iNetwork Systems Management Newsletter](#)

[Carsten Flensburg](#)

Carsten Flensburg

Wed, 12/07/2005 (All day)

As mentioned in the first article of this issue of this newsletter, the IBM-supplied command WRKREGINF can produce a printed report of registered exit programs, but the report is difficult to read. Carsten Flensburg to the rescue!

Presented here is the new command PRTREGEXIT (Print Registered Exit Programs). It provides a listing of registered exit programs in an easy-to-read format.

Just enter PRTREGEXIT on a command line and a report will be created. A small snippet of the report is shown here.

```

4/12/05 17:14:34 System: NOVASTAR      Registered exit programs
      Program: CBX949      Page: 1
Exit point name . . . QIBM_QSY*
Exit point          Format   Nbr.exitpgm Max.exitpgm Alw.dereg
Alw.chg.  Regist.Text
QIBM_QSY_CERT_APPS  CERT0100          23      *NOMAX      *NO      *NO
      *YES  Apps using certificates

Exit nbr. Program Library Exit program data Owner Creator System
Create date Change date Restore date
      1  QZBSSSL QSYS      QIBM_OS400_QZBS_SV > QSYS *IBM  00000000
08-12-03 25-08-05
      2  QZBSSSL QSYS      QIBM_OS400_QZBS_SV > QSYS *IBM  00000000
08-12-03 25-08-05
      3  QZBSSSL QSYS      QIBM_OS400_QZBS_SV > QSYS *IBM  00000000
08-12-03 25-08-05
      4  QZBSSSL QSYS      QIBM_OS400_QZBS_SV > QSYS *IBM  00000000
08-12-03 25-08-05
      5  QZBSSSL QSYS      QIBM_OS400_QZBS_SV > QSYS *IBM  00000000
08-12-03 25-08-05
      6  QZBSSSL QSYS      QIBM_OS400_QZBS_SV > QSYS *IBM  00000000
08-12-03 25-08-05
      7  QTVSSL  QSYS      QIBM_QTV_TELNET_SE > QSYS *IBM  00000000
08-12-03 25-08-05

```

As in all of Carsten's commands, there is a help panel group that explains the command details.

The following source code is included. As always, check the source code headers for compile instructions and additional documentation.

CBX949	RPGLE	Print registered exit programs - CPP
CBX949H	PNLGRP	Print registered exit programs - Help
CBX949X	CMD	Print registered exit programs - Cmd

You can download a zip file containing all the source code from the URL

<http://www2.systeminetwork.com/noderesources/code/clubtechcode/PrtRegExit.zip>

**Note:** As with all new programs, test these routines thoroughly before placing them into a production environment. No warranty is expressed or implied.

**Note from Carsten about the GENUUID MI instruction:**

I recently found [this interesting APAR](#).

It's about a reported issue with the GENUUID MI instruction (which can be used in ILE programs) that would lead to duplicate Universal Unique Identifiers being returned. The issue has now been resolved, but the PTF apparently only CUMed for V5R2. So for other releases, you'll need to order it.

In case you are wondering what a UUID looks like, I've attached a small sample program (CBX510) that will put an end to that mystery. The code is contained in the PRTREGEXIT.ZIP download file.
