Utility DspPTFInf: The Friendlier Alternative to DspPTF

[System iNetwork Systems Management Newsletter](#)

Chuck Lundgren

Wed, 05/26/2004 (All day)

This issue's utility by Carsten Flensburg is DspPTFInf, a simple utility that displays PTF information for a specified PTF ID number. Unlike IBM's DspPTF command, DspPTFInf doesn't require a product ID to work.

The utility consists of command CBX914X, CL program CBX914, and panel group CBX914X. There are only two parameters for DspPTFInf: the PTF number and the display option (*Vfy displays informational on whether the PTF is found, *DSP displays the DspPTF screen, or *CVR displays the PTF cover letter).

Instructions for compiling DspPTFInf are included with the source code, which you can obtain here:

<http://www2.systeminetwork.com/noderesources/code/clubtechcode/DspPTFInf.zip>

The above utility was written by Carsten Flensburg. For questions regarding this tip, contact Carsten at <mailto:flensburg@novasol.dk>.
