Wed, 08/02/2006 (All day)

You may recall my article "New Command to Enable NetServer Users" in the July 5th issue. Here, I present the complementary command Work with NetServer Users (WRKNETUSR). This command presents a Work with-style panel that lets you selectively enable disabled NetServer users.

The WRKNETUSR command relies on the List Server Information (QZLSLSTI) API to retrieve currently disabled NetServer users and present them in a Work-with list. An option is then provided to run the CHGNETUSR command against the NetServer user, thereby reenabling the user. A help panel group is included to document both the command and the list panel. The CHGNETUSR command is required to create this utility. See the July 5th article to obtain the code for CHGNETUSR and for a somewhat detailed discussion on the iSeries NetServer concepts relating to user profiles.

Here's a look at the WRKNETUSR command prompt

```

                                Work with NetServer Users  (WRKNETUSR)

Type choices, press Enter.

User profile . . . . . *ALL           Name, generic*, *ALL
Status . . . . . *DISABLED         *DISABLED
Output . . . . . *                  *, *PRINT
  
```

WRKNETUSR involves many source code members and objects, so I've included a CL program that will ensure that all objects are created correctly. **Check out the header of the CBX958M source for more information.**

For more details about command parameters and command usage, refer to the help panel group.

The following source code is included. As always, check the source code headers for compile instructions and additional documentation.

CBX958	RPGLE	Work with NetServer User - CPP
CBX958E	RPGLE	Work with NetServer User - UIM Exit Program
CBX958H	PNLGRP	Work with NetServer User - Help
CBX958P	PNLGRP	Work with NetServer User - Panel Group
CBX958V	RPGLE	Work with NetServer User - VCP
CBX958X	CMD	Work with NetServer User
CBX958M	CLP	Work with NetServer User - Build command

You can download a zip file containing all the source code from the URL

<http://www2.systeminetwork.com/noderesources/code/clubtechcode/wrknetsr.zip>

Note: As with all new programs, test these routines thoroughly before placing them into a production environment. No warranty is expressed or implied.
