

Utility DSPCCSID: Display a Language ID's Default CCSID

[System i Network Systems Management Newsletter](#)

Chuck Lundgren
Wed, 06/23/2004 (All day)

This issue's utility by Carsten Flensburg is the Display Language Default CCSID (DSPCCSID) command, which handily displays the corresponding default coded character set ID (CCSID) for the specified language ID. For example, entering:

```
DSPCCSID LNGID(ENU)
```

would output the message:

```
Language ID ENU has default CCSID 00037
```

If you need help in remembering the correct language ID, pressing F4 in DSPCCSID will display a list of all language IDs. A sample screen shot appears below showing a prompted list of language IDs:

```
-----
                        Specify Value for Parameter LNGID

Type choice, press Enter.

Type . . . . . : CHARACTER
Language ID . . . . .

AFR Afrikaans      ESP Spanish
ARA Arabic         FIN Finnish
BGR Bulgarian     FRA French
CAT Catalan       FRB Belgian French
CHT Traditional Chinese
CHS Simplified Chinese
CSY Czech         FRS Swiss French
DAN Danish        HEB Hebrew
DEU German        HUN Hungarian
DES Swiss German  ISL Icelandic
ELL Greek         ENP English Upper Case
ENG UK English    ITA Italian
ENU US English    ITS Swiss Italian
JPN Japanese Katakana  +
-----
```

DSPCCSID consists of command CBX916X, RPG programs CBX916 and CBX916C, and panel group CBX916H. Note that you must be at V5R2 or later to use this utility.

Instructions for compiling DSPCCSID are included with the source code, which you can obtain here:
<http://www2.systeminetwork.com/noderesources/code/clubtechcode/DspCCSID.zip>

The above utility was written by Carsten Flensburg. For questions regarding this tip, contact Carsten at <mailto:flensburg@novasol.dk>.
